Mr.Sunil Athalye  
ADOT Bridge Management Leader  
Arizona DOT  
205 South 17 Avenue  
Phoenix, AZ 85007

July 02, 2009

Dear Mr.Athalye:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. A list of your scour critical bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your scour critical bridges to your District Local Assistance Engineer (DLAE) by October 1, 2009.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>), provides POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the October 1, 2009 deadline for your POAs, you must submit a work plan to your DLAE by July 30, 2009 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

If you have questions regarding the scour POAs, please contact your DLAE (list available at: <http://www.dot.ca.gov/hq/LocalPrograms/dlae.htm>).

Sincerely,

A handwritten signature in blue ink, appearing to read "Denix B. Anbiah".

Mr. Todd Roberts  
Director Of Public Works  
City of Portola  
P O Box 1225  
Portola, CA 96122

July 02, 2009

Dear Mr. Roberts:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. A list of your scour critical bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your scour critical bridges to your District Local Assistance Engineer (DLAE) by October 1, 2009.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>), provides POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the October 1, 2009 deadline for your POAs, you must submit a work plan to your DLAE by July 30, 2009 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

If you have questions regarding the scour POAs, please contact your DLAE (list available at: <http://www.dot.ca.gov/hq/LocalPrograms/dlae.htm>).

Sincerely,

Mr.Randy Murphy  
Deputy Director  
County of Glenn  
P O Box 1070  
Willows, CA 95988-2298

July 02, 2009

Dear Mr.Murphy:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. A list of your scour critical bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your scour critical bridges to your District Local Assistance Engineer (DLAE) by October 1, 2009.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>), provides POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the October 1, 2009 deadline for your POAs, you must submit a work plan to your DLAE by July 30, 2009 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

If you have questions regarding the scour POAs, please contact your DLAE (list available at: <http://www.dot.ca.gov/hq/LocalPrograms/dlae.htm>).

Sincerely,

A handwritten signature in blue ink, appearing to read "Denix B. Anbiah".

Mr. Thomas Flinn  
Director Of Public Works  
County of San Joaquin  
P O Box 1810  
Stockton, CA 95201

July 02, 2009

Dear Mr. Flinn:

Federal regulation 23, Code of Federal Regulations (CFR) 650 subpart C, requires a Plan of Action (POA) for each scour critical bridge within your jurisdiction. A list of your scour critical bridges is enclosed. In order to meet the Federal Highway Administration's (FHWA) deadline, you must submit POAs for your scour critical bridges to your District Local Assistance Engineer (DLAE) by October 1, 2009.

More than half of all bridge failures in the United States are caused by scour where flowing water erodes supporting material from bridge piers and abutments. The POAs are intended to identify the steps to reduce the danger to the traveling public and the steps to resolve the scour issues on scour critical and unknown foundation bridges.

To assist you in this effort, Caltrans Structure Maintenance and Investigations web site: (<http://www.dot.ca.gov/hq/structur/strmaint/scour.htm>), provides POA templates, sample POAs, POA form field definitions, a Question & Answer section, and links to other POA reference material.

If you believe you will be unable to meet the October 1, 2009 deadline for your POAs, you must submit a work plan to your DLAE by July 30, 2009 that shows the steps you need to take to produce your POAs along with the schedule for each of those steps. Caltrans will work with FHWA to grant time extensions for agencies that submit work plans.

Federal Highway Bridge Program funds are available for reimbursement of the cost to develop the POAs. Please submit a request for authorization (E76) for PE funds to your DLAE and do not initiate any reimbursable work until the E76 has been approved.

If you have questions regarding the scour POAs, please contact your DLAE (list available at: <http://www.dot.ca.gov/hq/LocalPrograms/dlae.htm>).

Sincerely,

A handwritten signature in blue ink, appearing to read "Denix B. Anbiah".
